The Healing Power of Crystals

By Thomas T

Introduction

For many thousands of years – long before dinosaurs roamed the Earth – glittering gem crystals lay hidden away in potholes and rock crevices along the world’s coastline and buried in ancient riverbeds. They had been brought to their resting places by the winds and rains that were lashing this planet from its earliest days. The first peoples to walk the Earth unlocked this wonderful treasure and were soon valuing all kinds of gems for their beauty and for their ability, so they believed, to bring good fortune and ward off evil. Through the centuries, gems have kept their powerful grip on our senses and imaginations, and they are still prized for much the same reasons today.

Do not underestimate the healing power of crystals and the positive impacts of the stone, which can bring to the daily life of the modern society. Crystal healing is all about the use of crystals and their healing effect that bring about positive changes in human health. The information provided in this book can be used as a guideline; it is not meant to replace any conventional medical treatment.

AQUAMARINE

About The Crystal

The term “Aquamarine” means sea-water. It is the colour of the stone, that resembles to the colour of the ocean water, that makes it all the more distinctive. Aquamarine is a member of the Beryl family of the stones and as much its colour ranges from light to medium blue with shades of sea green here and there. It is because of its colour that Aquamarine is known to have a soothing effect over referred to as “protective stone”, Aquamarine prevents the wearer from all kinds of evil as well as viral infections.
